THE *MOVING* MESSAGE

The primary goal of this walk is to raise awareness about the communication difficulties that arise after stroke, brain injury, or other neurological change. The mission for 2012 is to reduce the stigma associated with trouble communicating, support those who are having difficulty, and educate people about how to successfully interact.

The walk will take place on the campus green where five laps equal a mile. You can walk, run, wheel...there are no limits. Come for the day or for an hour. There will be food, helpful information, a raffle, and a community of support. All donations raised will go to support the Moving Message fund. The fund is used to support individuals who need ongoing speech therapy and/or communication devices and need financial support in order to make this happen.
